WORK EXPERIENCE

Software Engineer at Traveloka

June 2019- Current

<https://www.traveloka.com/>

Traveloka is an Indonesian unicorn company that provides airline ticketing, hotel booking services, and lifestyle products. I work as a full-stack engineer building Axes for Biz which is a public self-onboard platform of Traveloka Xperience products.

- Maintain and implement UI forms. (ReactJS, Next.js)
- Improved the landing page performance (Lighthouse audit) by 154%. (ReactJS, Chrome DevTools)
- Design and implement database models and backend services. (PostgreSQL, Java)
- Implement a CI/CD of the static web frontend. (AWS, Terraform, Next.js)

Part-time Front-end Engineer at Bukalapak

March 2018- May 2019

<https://www.bukalapak.com/>

Bukalapak is an Indonesian unicorn company and one of the leading online marketplaces in Indonesia. I worked as a part-time front-end engineer at Core Front-end team.

- Implemented an internal dashboard of Core Trust and Safety team. (Vue.js, VueX, Vuetify, Express.js)
- Implemented a Vue UI Component Library. (Vue.js, Storybook, Jest, SASS)
- Maintained the mobile web (Vue.js, VueX, Nuxt.js), centralized front-end documentation (Express.js), and front-end data tracking utility. (JavaScript)

Part-time Full-stack Engineer at GoriTax

January 2019- April 2019

<https://www.goritax.com/>

GoriTax is a curated tax and accounting experts as a service.

- Designed the database (SQL, PostgreSQL), created the back-end with a RESTful API (Python, Django, Django REST framework), and created the server infrastructure (Docker, Kubernetes, AWS, Kops, Gitlab CI/CD).
- Implemented the front-end with a front-end engineer. (ReactJS, Redux, Material-UI)

Front-end Engineer Intern at Bukalapak

December 2017- March 2018

<https://www.bukalapak.com/>

Bukalapak is an Indonesian unicorn company and one of the leading online marketplaces in Indonesia.

- Rewrote the product detail page on the mobile web using Vue.js and RESTful API. (Vue.js, VueX, Nuxt.js)

Teaching Assistant at Computer Science Faculty of Universitas Indonesia
<https://www.cs.ui.ac.id/>

September 2017- December 2017

Assisted the lecturer of Web Design and Programming (International Class) course.

- Assisted students in lab sessions.
- Created weekly lab tutorials with other assistants.

Web Developer Intern at Jojonomic
<https://jojonomic.com/>

January 2017- February 2017

Jojonomic provides services that can easily control company expenses with Real-Time Approval.

- Developed web app features using HTML, CSS, JS.

VOLUNTEER

Community Contributor at GitLab

March 2020 - Current

GitLab is an open source web-based DevOps lifecycle tool. I contribute to GitLab by fixing and implementing several features.

- The second most MRs merged (57 MRs merged) of GitLab Hackathon Q2'2020. (Vue.js, Ruby on Rails)

Math Tutor at BETIS by Computer Science Faculty's Student Council of Universitas Indonesia **April 2016 - May 2016**

BETIS (Bimbingan Belajar Gratis) is a free tutoring program from Computer Science Faculty's Student Council for high school students or equivalent to prepare the national college entrance examination (SBMPTN).

- Helped students solved math problems.

AWARDS

Front-end Development Certification at freeCodeCamp
2016

Achieved "Front-end Development Certification" from freeCodeCamp at <https://www.freeCodeCamp.org/gilangmlr>.
Created several projects to achieve the certification which hosted at <https://codepen.io/gilangmlr>
