I have three years of experience working as a software engineer at two unicorn startup companies based in Indonesia. I like exploring both frontend and backend technologies. I like coding and being a life-long learner.

SKILLS

Frontend
reactjs | redux | next.js | vue.js | vuex | nuxt.js | jest | typescript

Backend
node.js | python | java | ruby on rails | sql | express.js | django | django rest framework | flask | postgresql

DevOps
docker | kubernetes | aws | terraform | gitlab ci/cd | gcp | kops (kubernetes operations)

WORK EXPERIENCE

Software Engineer at Traveloka   **June 2019- Current**
https://www.traveloka.com/

Traveloka is an Indonesian unicorn company that provides airline ticketing, hotel booking services, and lifestyle products. I work as a full-stack engineer building Axes for Biz which is a public self-onboard platform of Traveloka Xperience products.

- Maintain and implement UI forms. (ReactJS, Next.js)
- Design and implement database models and backend services. (PostgreSQL, Java)
- Implement a CI/CD of the static web frontend. (AWS, Terraform, Next.js)

Part-time Frontend Engineer at Bukalapak   **March 2018- May 2019**
https://www.bukalapak.com/

Bukalapak is an Indonesian unicorn company and one of the leading online marketplaces in Indonesia. I worked as a part-time frontend engineer at Core Frontend team.

- Implemented an internal dashboard of Core Trust and Safety team. (Vue.js, VueX, Vuetify, Express.js)
- Implemented a Vue UI Component Library. (Vue.js, Storybook, Jest, SASS)

VOLUNTEER

Community Contributor at GitLab   **March 2020 - Current**

GitLab is an open source web-based DevOps lifecycle tool. I contribute to GitLab by fixing and implementing several features. (Vue.js, Ruby on Rails)

- GitLab Hero.
- GitLab's 2020 SuperStar contributor.
- The MVP of GitLab's 13.3 release.
